

Public Announcement

“LONDON TECH & SERVICES” *has been awarded with the Certificate of Excellence in Business for excellent activity in 2020.*

Based on the analysis of the full information available to the public for the year of **“LONDON TECH & SERVICES”** has fulfilled all the required criteria in the field of liquidity and solvency and for this reason it is positioned in 6.02% of the best companies compared to over 124.270 companies active.

“Certificate of excellence” is a reliable indicator of the financial stability and quality of the Company's business activity. This kind of reference to the company provides a reputation and an advantage in the election compared to other companies from the same field of activity.

Business Excellence - business quality confirmation

Certificate of Excellence - The Certificate of Excellence for our clients is a confirmation of long-term systematic and quality work that maintains its position at the top of the country's economy, together with companies from the region and Europe, because in the process of evaluation are applied the same stringent criteria, which have proven to draw correct conclusions. Only 6.02% of the 124.270 registered companies meet these criteria, which is a reliable indicator that the company is stable and low risk.

Methodology

The methodology of calculation of excellence is unique to all European markets and is based on 18 parameters of solvency and liquidity from the financial report, the solvency status of the company, the blocking of accounts, cooperative companies and litigation. Statistical models are constructed on the basis of financial indicators (debt level, liquidity, efficiency and effectiveness) and on the basis of adverse events (bankruptcy, liquidation, foreclosure) over a given period.

About Solvent Rating

Solvent Rating doo is an international company which is a leader in Albania in providing the comprehensive solutions needed for day-to-day business development. The company was founded with the aim of assisting Albanian companies in finding new clients, controlling them, collecting accounts receivable and increasing liquidity. The purpose of this company is also to educate Albanian businessmen to use this information, a practice that has been followed in the world for many years by successful businesses. Thanks to this, today we have partnership relationships with a large number of local and international companies.
